VOLUME 99 • NUMBER 9

LAND MATTERS | 25

LETTERS | 29

RIPRAP | 38

Parks spring ephemeral in San Francisco, the dirt on Chelsea, a California botanic garden enters a new era of fire preparedness, and belowground consciousness is raised at a Texas ASLA meeting.

Edited by Linda McIntyre

RESIDENTIAL DESIGN | 44

Framing the Tallgrass Prairie

A Missouri farmstead restores native flora.

By Frank Edgerton Martin

DIALOGUES | 56

The 21st-Century Park and the Contemporary City

Three leading landscape architects converge at MOMA to assess the state of park design.

UNIVERSAL DESIGN | 66

Universal Experience In the Outdoors

Parks can be made accessible for people of all abilities while protecting the natural world.

By Thomas J. McCarthy, ASLA

FELLOWSHIPS | 80

There's No Place Like Rome

Too few landscape architects are applying for the prestigious Rome Prize. Would you be a good candidate?

By Daniel Jost, ASLA

MY SPACE | 102

Haag's Edible Estate

You may have heard of artist Fritz Haag's edible landscapes, but what about Rich Haag's delicious home garden?

By Thaisa Way, ASLA

COMMUNITY DESIGN | 110

On Board for Change

Community design centers provide opportunities for landscape architects.

By Stephanie Pankiewicz, ASLA, and Richard Laws

TECHNOLOGY | 120

Not Your Father's Cell Phone

Applications for cell phones can play an important role in the landscape architecture office.

By James L. Sipes, ASLA

Peaceful As a Hurricane's Eye

Two landscape architecture firms partnered to transform a millionaire's retreat into a stunning botanical garden and nature center.

But a series of hurricanes nearly destroyed their dream.

By Daniel Jost, ASLA

142

URBAN PARKS | 128

Down by the (Urban) Riverside

In Harlem, a blighted transportation corridor yields a new riverfront park.

By Alex Ulam

BOOKS | 158
